Detroit Diesel Unveils New Two-Year Extended Warranty on Powerpacks Replacement Fuel Injectors

REDFORD, Mich. - August 17, 2009 - Detroit Diesel PowerPacks, a set of six reliabilt(r) fuel injectors for Series 60(r) and MBE 4000 engines, now are available with an extended two-year, 150,000-mile warranty when installed by the experts at authorized Detroit Diesel service outlets.

Coupled with Detroit Diesel's reputation for quality and reliability, the new PowerPacks extended warranty offers additional peace of mind and cost savings for owner-operators.

"Fuel injectors wear at approximately the same rate, so installing PowerPacks and replacing all six fuel injectors instead of just one will save the owner-operator money in lower labor and parts costs, and reduce down time," said Kelly Gedert, Daimler Engine Product Marketing Manager. "In the long run, replacing all fuel injectors at once as part of a standard maintenance schedule can help avoid costly and time-consuming breakdowns, and improve engine performance."

Remanufactured to original equipment specifications, Detroit Diesel reliabilt fuel injectors deliver diesel fuel to cylinders at precisely

calibrated pressures and exact timing to prevent diminished performance over time due to normal wear. In addition, Detroit Diesel reliable fuel injectors are the only replacement injectors recommended for Series 60 and MBE 4000 engines.

With more than 800 locations in North America, Detroit Diesel's trained and qualified technicians are ready to assist customers with their fuel injector replacement. Visit www.detroitdiesel.com/supportnetwork to find a nearby location with genuine Detroit Diesel parts, maintenance products and reliable remanufactured components.

For more information about Detroit Diesel PowerPacks and reliable fuel injectors, please see your Detroit Diesel service advisor or visit www.detroitdieselstepup.com.

Detroit Diesel Corporation is a leading manufacturer of on-highway heavy-duty diesel engines for the commercial truck market.
